

CAMPUS DEVELOPMENTS

The University is in the midst of one of the most transformational campus redevelopments since the first phase of building on our Edgbaston campus was completed in 1909 under the auspices of Sir Aston Webb. The development projects, worth £606 million in total, are creating outstanding new facilities for our students. Following the opening of facilities worth £365 million until 2021, the University has now announced Phase 2 of its capital masterplan, which outlines new projects between 2022 - 2026.

Completed projects

1. [Aston Webb Student Hub](#) - **2015**
2. [Birmingham Dental Hospital and School of Dentistry](#) - **2016**
3. [Library](#) - **2016**
4. [Alan Walters Building](#) - **2016**
5. [Lapworth Museum of Geology](#)
6. [The Loft and Avon Room](#) - **2017**
7. [University of Birmingham Sport and Fitness](#) - **2017**
8. [Bournbrook Residences](#) - **2017**
9. Harding study space - **2017**

Opening September 2018

Every year, for five years, we will open a significant academic building for our students.

1. [Collaborative Teaching Laboratory](#) - The Collaborative Teaching Laboratory (CTL), will bring together practical teaching activities across science and engineering disciplines into one state-of-the-art building. The CTL will incorporate a wet lab, dry lab and e-lab, and prepare students more readily for future professions by reflecting the multifaceted nature of working life.
2. [Hotel and Conference Park](#) - A new hotel and conferencing facility on Edgbaston Park Road, will provide 172 beds for visitors to campus and conference facilities.

Projects to be completed

[Green Heart](#) - A new parkland measuring over 12 acres, the Green Heart project will open up the centre of campus for students, staff and the local community to enjoy. It will provide a unique space for performances, socialising, meeting and

studying, while opening up views across the whole campus, as envisaged in the 1920s. Innovative features include a new café and bar, grass auditorium and outdoor cinema. The parkland will also be a sustainable, natural and environmentally friendly landscape; both for people and wildlife.

The majority of works will be completed **November 2018**, with final touches being completed in the **first months of 2019**.

University Business School extension - Providing much needed facilities to a successful and growing centre of excellence, the Business School extension will allow the majority of its activities to take place in one building and increase teaching and learning space.

Completed 2019.

[Teaching and Learning Building](#) - Construction is underway for a new purpose-built hub for education at the heart of campus. The Teaching and Learning Building will provide flexible teaching and social study space to support the modern learning experience at Birmingham. Facilities will include: 500 & 250 seater lecture theatre, 10 seminar rooms, informal learning spaces for up to 1,000 students and a café.

Completed early 2020.

[School of Engineering](#) - The University has begun work on a new School of Engineering building to bring together many engineering disciplines into one building. The new facility will provide flexible ways of working and learning, as well as social space for engineering students.

Completed 2020.

Molecular Sciences Building- The new building will focus on strengthening our core research capabilities in the chemical, environmental and bio-molecular sciences. A designated hub for the School of Chemistry will be created, and office and laboratory accommodation will be provided for students, staff and researchers.

Completed 2021.
